

Project Coyote invites you to discover the **World of Wolves**

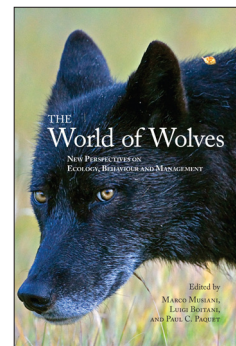

A New Era for Wolves and People:

Wolf Recovery, Human Attitudes and Policy

Wolves hold an almost mythical status in the cultural history of Europe and North America. For centuries they have been the subject of fairy tales and folklore, embodying mystery, cunning, and threat. People are drawn to their beauty, intrigued by their behaviors, and sometimes fearful of their presence. Now as wolves make a come-back in parts of the lower 48 their proximity continues to captivate, fascinate and incite debate.

Paul Paquet and Marco Musiani have made the study of wolves their life's work and are experts in wolf behaviour, biology, habitat, and most particularly in the relationship between wolves and people. They will be sharing their stories, their research, and their observations in three free public talks.

Paul Paquet and Marco Musiani, along with Luigi Boitani, are co-editors of two new **University of Calgary Press** books on wolves and their world.

The World of Wolves:

New Perspectives on Ecology, Behaviour, and Management

JOIN

Dr. Paul Paquet & Dr. Marco Musiani

all events are free and open to the public

Thursday, June 24, 2010

6:00 - 8:00 pm

MARIN HUMANE SOCIETY

171 Bel Marin Keys Blvd.
Novato, California

Friday, June 25, 2010

7:00 - 9:00 pm

**BOOK PASSAGE BOOKSTORE
IN CORTE MADERA**

51 Tamal Vista Blvd.
Corte Madera, California

Saturday, June 26, 2010

3:00 - 5:00 pm

BORDERS, UNION SQUARE

400 Post Street
San Francisco, California

PAUL PAQUET has studied wolves for more than thirty-five years and is an international authority on carnivore ecology. He has written extensively on wolves and serves on several international government and NGO advisory committees and is the founder and director of the Central Rockies Wolf Project in Alberta, Canada where he is an adjunct professor at the University of Calgary.

MARCO MUSIANI was born in Rome, the city of the famous she-wolf, and conducts research and publishes internationally on wolf management and genetics. He is currently affiliated with both the University of Calgary and the University of Montana, and has a primary focus on the ecology of wolves and other large carnivores in Canada and the United States.
